EXPLANATORY NOTES

The following refers to the column headings on each page as an aid in interpretation.

Date

Dates are shown as recorded but please note the following:

.. more lengthy abstracts of wills are divided into more than one part identified as (01), (02) etc; these will usually appear out of date sequence.

.. if the original shows an illegible or incomplete date, it is so recorded and may also appear out of sequence.

.. dates are shown in Old Style with the year beginning on March 25. Occasionally this will result in what appears to be an illogical sequence of dates. An example would be a will made on November 17, 1740, and probated on March 12, 1740.

Names

While I agree generally that names should be recorded as they appear in the original documents, some exceptions have been made. This book contains alphabetized listings. However, many names have widely variant spellings even for the same individual. For this reason some spellings have been altered to the most usual spelling to reduce possibly overlooking a crucial entry as a result of the scattering which would otherwise occur. When this has been done the original spelling is shown in the "Remarks" column as OT ------.

References

SomP - Somerset Parish

StpP - Stepney Parish

WorP - Worcester Parish

Code

This column is used in some cases to show the type of document referred to or, for parish records, what was recorded. "W", "I", and "A" correspond to Will, Inventory, and Administration with "B", "M" and "D" to born, married and died.

Place

When a document indicates a location for an individual, it is shown in this column. Numerous entries also will show "WorC" for Worcester Co., even for periods before 1742 when the county was formed. This results from a split of the records at some subsequent date and does result in duplication in some cases.
